Crabtree's Topaz range of quality switches & sockets is affordable yet stylish and offers a simple, modern look that adds a touch of class to any home.

Designed & engineered in South Africa by Crabtree, the Topaz Range has clean lines & recessed levers that enhance the uniqueness of the range, which has a flat appearance without the switches protruding from the coverplate.

The Topaz range was created with the electrical contractor in mind and its monoblock construction makes the range easy to install and wire.

The new design of the Topaz two-and-three lever switches now offers full two-way switching with separate terminals for each circuit.
