

THAT WHICH IS BUILT SOUNDLY **ENDURES WELL**

slim. **elegant.** easy-to-use

COMPLIES TO THE DIMENSIONS OF SANS 164-2

COMPANY PROFILE

Crabtree South Africa has steadily grown to become the leading electrical accessories manufacturer in South Africa and a dominant regional player. A wide range of electrical wiring accessories such as switches and sockets (domestic/commercial and industrial), trunking and fittings and a fit for purpose range of domestic leads and adapters are supplied into the building/construction, and general industrial sectors. Product specific information can be accessed at www.crabtree.co.za.

COMPANY MISSION

To develop world class operational capabilities within our facilities to supply market leading, branded products for the installers & users of low voltage electrical infrastructure in South Africa, the UK and Sub Saharan Africa to create a convenient, reliable and safe electrical environment inside living spaces.

COMPANY VISION

We develop quality products for the installers and users of low voltage electrical infrastructure to create a convenient, safe and reliable electrical environment inside living spaces.

Single-Phase circuits supplying Socket outlets rated at NOT more than 16Ampere

Single-Phase Circuits that only supply socket-outlets rated at not more than 16A shall, if the circuit protection is rated at more than 20A, use only protected socket-outlets, with, as far as is practicable, discrimination between the protective devices for the circuit and the protective devices associated with the socket-outlets. The protective device of a protected socket-outlet shall...

1. have a fixed rated current that does not exceed the rating of the socket-outlet,
2. be mounted next to the socket-outlet that protects it
3. provide protection against overload currents,
4. unless short-circuit protection is provided by a separate device, for example on the distribution board, provide protection against short-circuit currents,
5. if it needs the protection of a back-up short-circuit device, be marked with the required or maximum rating of the back-up device,
6. if it protects more than one socket-outlet, be so installed that all the socket-outlets are connected in parallel, have the same rated current and are mounted next to the device, and may, if a ring circuit is used instead of a radial circuit, use conductors least 16A.

Installing Switches and Sockets

- Isolate mains before starting work.
- For flush mounting use a 50mm deep steel box as per SABS-1085.
- Recommended stripping length for cable installation is 8mm.

Cables should be connected as follows:

- Terminal L–Live (Red)
- Terminal N–Neutral (Black)
- Terminal E–Earth (Green/Yellow)

Conditions of Use

The products referred to in this instruction leaflet should be installed by suitable qualified personnel in accordance with the requirements of all relevant legislation, regulations and the accepted practice in the industry. Any further information which may be required about the use for which any specific product has been designed and tested, or about the conditions of use, is available on request.

Bell Press Wiring Diagrams

One Way Dimming with Standard 4 Wire Dimmer

Multiple Dimming with Standard 4 Wire Dimmer

1. FOR ONE WAY DIMMING

- Connect the orange and pink wires to the respective terminals of the bell press module
- Connect the red dimmer wire to the Live incoming wire
- Connect the yellow dimmer wire to the load/return wire going to the lights.

2. FOR 2 WAY DIMMING

- Draw 2 strapper wires from the wall box containing the dimmer to the next wall box where you need to dim the same set of lights
- Connect the strapper wires to the respective orange and pink wires of the dimmer
- In the next wall box connect the strappers to the respective terminals of the bell press modules

Converting 2 Way Switching Into 2 Way Dimming

- Place the dimmer module in wall box 1 where the load/return wires to the lights are.
- Connect the yellow dimmer wire of the dimmer to the load/return wire you need to dim.
- Connect the red and orange dimmer wires to the respective terminals of the bell press module
- Connect the existing strapper wires coming from wall box 2 and also connect them to the respective terminals of the bell press module
- Cut or insulate the pink wire of the dimmer module
- The strapper connected to the red dimmer wire in wall box 1 is connected to the incoming Live wire in wall box 2
- One side of the bell press module is also connected to the incoming Live wire
- The other side of the bell press module is connected to the remaining strapper

FITTINGS

CEEN FITTINGS

- Conduit fittings comply with the relevant SABS requirements. This also includes flame and UV resistant material
- Installation is quick and easy with a minimum of tools required to complete the job.
- PVC Conduit fittings provide facility for a neat installation, whether surface or flush mounted.
- PVC Conduit fittings will not rust or corrode and are unaffected by water, most acids, oxidising agents and electrolyte action.

ELECTRICAL DRYWALL BOX

- Accommodates various thicknesses, min 7mm and max 25mm.
- Can be used for new or existing installations.
- Cost reduced solution compared to traditional trunking or cable management solutions.
- Made from non-conductive material with no sharp edges reducing the risks associated to earth leakage with metal back boxes and wire insulation integrity.
- The Crabtree Electrical DryWall box is made of engineering plastic which is self-extinguishing up to 650° C.
- The 'quick fix yellow lugs' allow for quick tool-free installation and firmly secure the box to the dry wall. Each box has multiple knockouts for standard electrical connectors and adapters.

PVC Binding Fluid		
Description	Box	Part Number
200ml	20	9184

CONSTRUCTION

- Manufactured from white, high impact resistant PVC, which satisfy the requirements of the SABS 1084-2-1 Code of practice, ISO9002.
- Supplied complete with base and clip fastening lid which provides facility for inconspicuous wiring routes in domestic and commercial situations.
- Complete range of fittings available to make tile surface trunking system adaptable to any room configuration.
- Will not rust and is impervious to most mineral acids and alkalis.
- Compact trunking is self-coloured white and provides an excellent base if painting is required for decorative purposes.

INSTALLATION

- Trunking is designed for any surface installation.
- Installation is quick and easy by using wood screws on wooden surfaces or drilling into masonry and fixing with rawl plugs.
- Secure lip on lid fastening prevents unauthorised interface with electrical circuits - lid has to be peeled off base from end to end.
- Trunking standard lengths, YT/1 in 2 meters, all others in 3 meters. Available in white.

40 x 25mm (YEP/4)	10	9403
40 x 40mm (YEP/5)	10	9404

CONSTRUCTION

- Extruded from flame retardant rigid PVC.
- Supplied as a unit comprising base and clip-on lid system requiring no screws or fasteners; lid cannot separate accidentally.
- Robust - protects cables and conductors against mechanical damage.
- Does not rust.
- Will not attract termites and rodents.
- Self coloured grey and white.

INSTALLATION

- Can be suspended or surface mounted.
- Lightweight (the weight of equivalent steel section) makes installation speedy and easy, which leads to advantage of saving time and money.

TRUNKING STANDARD LENGTH 3 METRES.
